

ARK-XIII/3 processing log

a) Original data

Original Parasound data were copied from 115 computer tapes. 11 of these tapes were unreadable, 6 tapes were partially unreadable.

b) Statistics

Data volume	: 19.1 GB
Total number of files	: 7193

c) Navigation

The navigation is the original Parasound navigation recorded at expedition time.

Figure 1: Map showing the positions (red points) extracted from first headers of PS3 files.

d) Processing

No processing was performed. The data is saved 'as logged', i.e. time stamps and/or navigational data may be incorrect.

e) *Miscellaneous*

- The meta-information was extracted from Parasound headers.
Time stamps are not equidistant and only present where Parasound data were logged.

- The data set contains several data gaps (listed below) due to unreadable tapes:

08141538 - 08141634
08161838 - 08170143
08170942 - 08171145
08171521 - 08171736
08171951 - 08181904
08191156 - 08191224
08210751 - 08210831
08221109 - 08221122
08221757 - 08222355
08231501 - 08231728
08302308 - 08302325
09061951 - 09070219
09171009 - 09180226
09182246 - 09190954
