

Core no. 13519 G.C. N 5° 39.5' W 19°51.0': 2862 m b.s.l.

Age control: Date: 19/01/1993

- *C. wuellerstorfi*, *U. peregrina* group and *G. sacculifer* ^{18}O records from Sarnthein et al. (1984), Zahn et al. (1987), suppl. by Winn et al. 1991.
- AMS ^{14}C analogue stratigraphy.

Core fit:

- None.

Surface sediment age:

- Zero, assuming no sediment loss at top of gravity core 13519-1.

Age/depth correlation:

Orig. depth [cm]	^{14}C age [ky BP]	Calendar years [ka]	Sed.rate [cm/ky]	Original interval/ material/ $\delta^{18}\text{O}$ stratigraphy	Remarks
0		0			
13.5	9.1	9.8	a)	1.38	AMS ^{14}C analogue
24.75	14.8	18.3	a)	1.32	AMS ^{14}C analogue
33.5	20	(23.5)	a)		AMS ^{14}C analogue ignored
53.5	26	29.5	a)	2.57	AMS ^{14}C analogue

a) corrected after Bard et al. (1990).

Remarks:

- Corg data from Müller et al. (1983).
- Dry bulk density different from Müller and Suess (1979). Values in data set are based on values in neighbouring cores 16453 to 16458.
