

Core no. 13521 G.C. N 3°01.2' W 22° 01.9': 4504 m b.s.l.

Age control: Date: 1991

- *C. wuellerstorfi* ^{18}O record (Winn et al., 1991), *G. sacculifer* data from Tiews (1985).
- AMS ^{14}C analogue stratigraphy.

Core fit :

- None.

Surface sediment age :

- 6.0 ka, based on linear extrapolation of the sedimentation rate during Termination I.

Age/depth correlation :

Orig. depth [cm]	^{14}C age [ky BP]	Calendar years [ka]		Sed.rate [cm/ky]	Original interval/ material/ $\delta^{18}\text{O}$ stratigraphy	Remarks
0	- . -	6				
10.5	9.1	9.8	a)	2.79	AMS ^{14}C analogue	
15.5	9.8	11.5	a)	2.94	AMS ^{14}C age of ^{18}C mini- mum of <i>C. wuellerstorfi</i> in EN120-1 and V23-81.	
34.5	14.8	18.3	a)	2.79	AMS ^{14}C analogue	
63	26	29.5	a)	2.54	^{18}O event 3 (age is problematic!)	<i>G. sacculifer</i>

a) corrected after Bard et al. (1990).

b) ^{18}O event stratigraphy after Martinson et al. (1987).

Remarks :

- Corg data (M. Hartmann, unpublished).
