Advice on Lat-Long choice for legacy stations   Inbox

Jean-Marie Monget Dear Carla, as I was preparing the "simplest" possible

Nichole Anest
to Jean-Marie, carla

Hi,
Immediately, it looks like a lot of rounding of decimal places going on and a

#1) The actual ship's log (what you referenced is the core description), has tv
average of these two sets.

#2) Horn&Delach did a poor/inconsistent rounding off!
#3) Mero copied them.
#4) Same or data came from one of the previous...
#5) The lat-long in the IMLGS are as stated above. Curious where you found
#6/#7) Broecker did another inconsistent job of rounding.
#8) I do not know where that .kml file gets its data?

I say use the coordinates in the description (12 16.5N, 120 9.5W), without ro

Thanks,
Nichole

to Nichole, carla

Dear Nichole,

Many thanks for your help, and sorry again for rising this inconsistency.

All the best
